Onslow, WA

DURATION
Oct 2013 - Jun 2015

VALUE
\$42.2 million

MAN HOURS
250,000

Project Overview

The Chevron-operated natural gas field, Wheatstone Project is one of Australia's largest resources projects, located at Ashburton North, 12km west of Onslow in Western Australia. The project consists of two LNG trains with a combined capacity of 8.9 million tonnes per annum and a domestic gas plant.

ECM was subcontracted to the Kiewit Ertech Joint Venture, providing general services works on the project.

ECM provided a range of services from miscellaneous works to major construction infrastructure.

Scope of Work

- Installation and maintenance of underground and above ground utilities.
- Temporary electrical systems and telecommunications cable installation.
